# Leading ready-mix concrete (RMC) player in Singapore with c.40% market share. Pan-United Corp is the largest ready-mix concrete player in Singapore with an estimated 40% market share. As such, we see it as a beneficiary of Singapore's construction activities going forward, as it has high exposure to, and is a strong beneficiary of, construction activities in Singapore. According to the Building and Construction Authority (BCA), Singapore's total construction demand is forecasted at SGD31-38bn pa from 2025 to 2028.

**Beneficiary Of Singapore Construction Projects** 

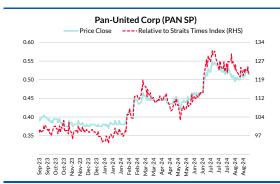

- Strong construction demand this year. The BCA has forecasted total construction demand of SGD32-38bn for 2024. It also expects demand for RMC volume to grow from 12-13m cu m, compared to 12.25m cu m in 2023. This is led by public sector demand of SGD18-21bn, driven by public housing and infrastructure projects including Housing & Development Board (HDB) build-to-order (BTO) projects, Cross Island Line (CRL) Mass Rapid Transit (MRT) contracts, Tuas Port development, Changi Airport Terminal 5, and other major road enhancement and drainage improvement works. The private sector construction demand is projected at SGD14-17bn, mainly from residential property developments under the Government Land Sales, expansion of the two integrated resorts, development and redevelopment of commercial, mixed-used and industrial properties and facilities.
- Could benefit from Johor-Singapore Special Economic Zone (JS-SEZ). Pan-United has a concrete batching plant in Johor, Malaysia, established since 2015 that serves the local market. With the development of the JS-SEZ over the next few years, we see Pan-United as a long-term beneficiary in the supply of RMC and building materials for the increased construction within the zone, that includes data centres, semiconductor factories and industrial parks.
- Positive 1H24 results. 1H24 revenue and core earnings came in at SGD384m (+7% YoY) and SGD19m (+22% YoY). Revenue growth was led by higher selling prices as volumes remained relatively flat. Gross margin was stable at 21.6% (+0.3ppt), while EBIT margin grew 1.1ppts to 6.1% due to operating efficiencies and leverage. Particularly, staff costs declined 2% to SGD30m while operating expenses grew just 6% YoY to SGD19m.
- Valuation. Pan-United currently trades at 9x FY24 P/E according to Bloomberg data vs peer average at 10x. Forward P/E is also below its 3-year average of 7x or near -1SD of its mean. Dividend yield is decent at c.5%.
- **Key risks.** As Pan-United supplies RMC to construction projects in Singapore, key risks to earnings would be a slowdown in construction projects and activities, as seen during the COVID-19 lockdown period in 2020.

# **Company Description**

**About Pan-United.** Pan-United is the largest supplier of RMC and concrete in Singapore with an estimated 40% market share. It is also a global leader in low-carbon concrete technologies and one of Asia's largest producers of low-carbon concrete. We believe the group is a beneficiary of Singapore's construction activities, backed by key public projects, including HDB BTO projects, CRL MRT contracts, Tuas Port development, and Changi Airport Terminal 5

In the longer term, Pan-United could be a beneficiary of increased construction activities in the JS-SEZ. The group plans to become a carbon-neutral company by 2050, and aims to offer only low-carbon concrete by 2030 and carbonneutral concrete by 2040.

Key business segments. Pan-United mainly derives its revenue from concrete and cement, where it has presence mainly in Singapore. Prior to FY21, the group also owned Changshu Xinghua port in China, which has since been spun off. Today, it has operations in Malaysia and Vietnam. However, contribution from these markets are small relative to the Singapore operations.

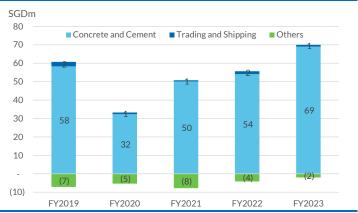

Other sources of income include its 10% associate stake in Indonesian coal mining entity Lanna Harita Indonesia. Revenue trends decently with Singstat data – Contracts Awarded And Progress Payments Certified By Sector And Development Type, Annual – where the correlation stands at 0.7. Pan-United's customers are construction project contractors. There is no single customer concentration, given projects vary across the board and different projects are awarded to different contractors at different points in time.

# **Valuation**

Trading at <1x PEG based on current growth momentum. Pan-United currently trades below its 3-year average forward P/E of 7x or near -1SD of its mean. We compare the group to regionally listed building material players, which average at higher forward P/E multiples. Based on Bloomberg data, earnings growth is expected to be at 18% YoY for this year, translating into a PEG of <1x.

**Dividends.** Over the past four years, Pan-United has consistently paid out 0.5 SG cents per share in interim dividends and has steadily increased final dividends from 0.8 SG cents to 1.8 SG cents per share. Its dividend practice is to consistently pay out a sustainable DPS to shareholders. Over the past two years, dividend payout ratio has been at 44-45% of earnings.

As the business generates positive operating cash flow and balance sheet is in net cash, we minimally expect the same level of DPS payouts going forward. Dividend yield is decent at c.5% based on Bloomberg data.
