Re-setting Expectations; D/G To NEUTRAL

- **Downgrade to NEUTRAL from Buy, new DCF-based TP of MYR3.95 from MYR4.20, 9% upside with c.4% FY25F yield.** A recent meeting with management suggests that our view of greater integration synergies panning out may be too optimistic, with IT investments likely to only peak in FY26F due to execution delays. We trim FY25-27F earnings by 2.4%, 8.6% and 8.5% after adjusting potential opex and capex synergy assumptions. Competition, weaker-than-expected synergies and/or earnings are key risks.
- **Exploring 10% more sites to be decommissioned; some delays in IT investments.** CDB is on track to complete its network integration by end-2025 (2Q25: 84%), based on the initial target of c.17,000 combined sites (from 24,000 pre-merger). It is, however, exploring the decommissioning of a further 10% of sites in remote areas, pending a cost-benefit study, with a decision made by end-2025. Post the right-sizing (c.600 employees) in 2024, CDB has no plans to embark on another such exercise, but will look at opportunities to drive greater efficiencies. It expects IT investments, which started late in FY23, to continue well into FY26F (potentially spilling over into FY27F) vs the earlier expectation of a 4Q25/1Q26 peak – as the process is complex and involves over 100 IT and support sub-systems (business support, operational and billing systems). CDB booked a lower integration cost of MYR91m in 1H25 (FY24: MYR385m) but this is expected to ramp up in 2H25 from related IT investments, based on management's guided full-year integration cost of MYR317m.
- **Capex to drop from FY26F.** Even with the IT upgrades, decommissioning of additional sites and incremental new sites planned, it expects FY26 capex to decline YoY (FY25 capex/sales guidance: 14-16%) as a large part of integration capex was already incurred over the past two years.
- **CDB said discussions with the authorities on the expanded Sales & Service Tax, which took effect on 1 Jul, is moving in the right direction** with mobile network operators collectively pursuing the matter. Given the extent of concessions sought (enterprise services also included), additional time is needed for parties to come to a landing. We see downside to the prior guidance of MYR100m worst-case impact from the SST.
- **Digital Nasional (DNB) – getting it right.** Talks are ongoing with DNB and the Finance Ministry (MOF), but management remains tight-lipped on potential outcomes. An optimal scenario pursued would ultimately hinge on access to 5G spectrum, infrastructure sharing and revisions to the 5G wholesale framework. We do not rule out an extension of the November deadline for the exercise of the put-and-call options by MOF and the MNOs as discussions on the eventual form that DNB would take requires more time. All MNOs including CDB have invested MYR350m to date in DNB (equity and shareholder advances), including the MYR117m capital injection in May.
